***Radiologist Mainwaring Leaving Diagnostic Health Center of Beaumont***

**BEAUMONT, Texas** — Brent Mainwaring, M.D., has announced that he is ending his relationship with Diagnostic Health Center of Beaumont, where he has practiced radiology for the past 18 years. Effective July 4, 2011, Dr. Mainwaring will leave to pursue new opportunities with medical professionals in the Beaumont area. Dr. Mainwaring said he is making the change so that he can continue his work to improve patient care and diagnostic imaging services in the region.

“I am committed to the Beaumont community and strongly value the relationships I have developed over the past 18 years,” Dr. Mainwaring said. “This decision allows me to maintain those relationships and to build a new imaging center, keeping medical decisions where they belong — closer to the doctor and patient.”

Construction is currently underway on a new, locally owned and operated outpatient diagnostic facility at 3405 College Street in Beaumont. Dr. Mainwaring said the facility will focus on providing community-based diagnostic imaging services supported by local physicians and their patients. The new center will provide MRI, ultrasound, digital mammography and general radiography tests.

Dr. Mainwaring is board certified by the American Board of Radiology with subspecialty expertise in diagnostic radiology. He has special expertise in MRI, mammography and ultrasound.

Dr. Mainwaring will remain available to physicians during this transition at 409-832-2211 or [info@theodc.net](mailto:info@theodc.net).
