**Marty Craig Women's Center at
The ODC Sets New Standard in Women's Imaging**

Only all-Hologic women's imaging center in region offers advanced technology, unique environment

BEAUMONT, Texas — The Marty Craig Women's Center at [The ODC](#), uniquely designed for women's peace of mind, privacy and comfort, is now open. Features include a separate waiting room, original Darrell Troppy artwork, natural lighting, heated robes and a specially trained support staff.

The ODC Medical Director and radiologist Brent Mainwaring, M.D., named the center after Beaumont, Texas, resident Marty Craig, a breast cancer survivor and Vice President of the Julie Rogers "[Gift of Life](#)" program.

"The center honors Marty's tireless work in the community on behalf of women's health, breast cancer awareness and the 'Gift of Life' program," said Dr. Mainwaring.

Services at the center include breast ultrasound, digital mammography, breast MRI, breast biopsy and DEXA bone densitometry. All the equipment is manufactured by [Hologic Inc.](#), which is focused solely on providing the most advanced women's health products and services. The Marty Craig Women's Center at The ODC is the only all-Hologic women's imaging facility in Beaumont and the Golden Triangle.

Craig, who helped design The ODC and the women's center, said the privilege of working on the project has been one of her life's great pleasures.

"The gift of having the Women's Center bear my name gives me such joy that no words can come close to expressing what is in my heart," said Craig. "Beaumont has blessed me in many ways and with many awards, but this one can never be topped."

Dr. Mainwaring discovered Craig's breast cancer in 1999 and performed the biopsy that led to her lumpectomy.

"Dr. Mainwaring has been an intricate part of my and my husband's health care for eighteen years, and his family is part of my extended family," Craig continued.

The ODC recently celebrated the official grand opening of its new 8,300-square-foot imaging facility at 3405 College Street. The center provides state-of-the-art MRI, digital mammography, CT, ultrasound and general X-ray services to the Golden Triangle area of southeast Texas. The ODC focuses on providing community-based diagnostic imaging services supported by local physicians and their patients with a mission to improve patient care and diagnostic services in the region.

For more information visit www.theodc.net or call 409-832-2211. The ODC is on Facebook at www.facebook.com/TheODC.

About The ODC

The ODC (The Outpatient Diagnostic Center) provides state-of-the-art MRI, digital mammography, ultrasound and X-ray services to Beaumont and the entire Golden Triangle area. Our mission is to provide the most advanced diagnostic imaging services in a community-based setting, keeping medical decisions closer to the doctor and patient. The women's imaging center at The ODC offers breast ultrasound, mammography, breast MRI, breast biopsy and DEXA bone densitometry in an upscale, spa-like environment.
